Education

Keimyung University / DigiPen Institute of Technology (Dual Degree Program) Expected Graduation April 2028

BS in Computer Science in Real-Time Interactive Simulation | GPA: 3.5/4.0

Naver Boost Camp AI Tech September 2025 – February 2026

- CV AI Modeling

Military Service May 2022 – November 2023

TECHNICAL SKILLS

C++, C, Python, OpenGL, WebGL, PyTorch, Unreal Engine 5

PROJECTS

Pour | **Director** January 2026 – February 2026

- Led the development of an AR-powered cooking assistant that estimates container capacity using computer vision and 3D reconstruction.
- Coordinated project development and contributed to the design of the computer vision pipeline, integrating Depth Anything 3 and YOLO26-seg for depth estimation and object segmentation.

Forest of Alchemy | Technical Lead September 2024 – June 2025

- Developed a custom game engine using C++ and OpenGL to support a turn-based card adventure game.
- Designed and implemented core combat mechanics and gameplay systems, overseeing technical development and integration.

Doppelganger | Technical Lead February 2025

- Developed a memory-based arcade game combining rapid decision-making with real-time gameplay.
- Implemented A* pathfinding to support intelligent navigation and movement behavior.

Unstoppable BB | Solo Developer / Director March 2024 – June 2024

- Independently designed and developed an auto-scrolling platformer, implementing core gameplay mechanics and systems.
- Managed the full development lifecycle, from initial concept and gameplay programming to integration of visual assets.
